**Seminar Topic:**

The Power of Retrospectives: Applying Learned Wisdom

**Abstract:**

Tick, tock. Tick, tock. The clock is ticking. It is the end of a long project and the geographically dispersed team wants to spend time to look back and capture what worked well and what needs to be done differently next time so they can improve the next project. You need a process to gather learnings, and you don’t want to use a traditional post mortem. What to do? This presentation will share the work being done at Intel in the Corporate Platform Office to advance organizational learning across Intel via a flexible and effective retrospective practice.

**Day:** November 19, 2009  
**Time:** Noon – 1 pm  
**Room:** Unitus Bldg. 203  
2121 SW 4th Avenue  
Portland, OR 97201
